Self Controlled Energo Neuro Adaptive Regulator

Designed for Professional athletes

Sports people

Coaches

Fitness instructors

Try SCENAR SPORT - Reduce Trauma Downtime

RITMSCENAR Sport is an electro-therapy device with built-in electrode that delivers complex electrical impulses through the skin. These impulses stimulate the Nervous System to generate Neuropeptides, the key biochemicals needed by the body to heal itself.

Neuropeptides may be considered as our body's own internal pharmacy.

RITMSCENAR Sport uses a sophisticated software program which controls and automatically changes the impulse waveforms and frequencies to prevent the body from adapting to the stimulation.

RITMSCENAR Sport is designed for sport professionals to **increase performance effectiveness, reduce trauma downtime** and **speed-up rehabilitation process**.

Pain, cramping soft tissue injuries, contusions, tendon pulls and ligament tears are **common conditions** readily treatable by SCENAR therapy. Treatment has also proven to be effective in faster recovering after event from physical exhaustion, tired and aching muscles, and other post-event pains.

RITMSCENAR Sport is a **portable, light, easy to operate** device that can be used at competitions, training sessions, travelling or other locations of a sports team.

“SCENAR supported my nervous system, encouraged my body to heal, allowed me to maintain strength and fitness so I could compete at my optimum level ”

Layne Beachley
7 times World Surfing Champion
Australia

“The SCENAR technology is the new sensation in sports performance.

We have used it during our preparation for the 2008 Rowing Season and the Junior World Championships.

The SCENAR technology was very effective in speeding the recovery process, injury prevention and quick pain relief. The feedback from the athletes was positive and their general health improved.

SCENAR is incredible technology with wide application in Sports. ”

Stani Slavova
NSW Elite Development Coordinator – Rowing
Coach of the 2008 Australian Rowing Junior Team

Device Parameters

RITMSCENAR Sport

Working Modes	Subjective (Manual) Dosed (Automatic)
Dose indication	Sound and light
Amplitude modulation	3 : 1
Frequency modulation	30 -120 Hz, cycle 7 sec
Influencing impulse frequencies	14, 60, 90, 340 Hz
Intensity <i>(the number of impulses in a packet)</i>	1
Amplitude of the stimulating pulse at a standard load	(1,7-2,8) ... (100-140) V
Indicator	Light emitting diodes
Power supply	one 9V alkaline battery
Temperature	10 to 35C (Operating) -50 to 50C (Storage & Transportation)
Weight	0.2kg
Dimensions	130 x 50 x 25mm
Warranty	2 years
